

M-Pro 7 Copper Remover

Description

- Non-toxic, biodegradable, environmentally safe copper remover exceeding existing P2 initiatives.
- Non-ammonia based technology dissolves copper up to 4 times faster than traditional ammonia based products.
- Unlike ammonia based products, is completely safe on steel.

The Need For M-Pro7 Copper Remover

- Copper fouling is a significant issue for high powered rifles and machine guns.
- Military does not have a MILSPEC or procedures for copper removal leaving soldiers to use non-approved alternatives including highly toxic and corrosive chemistries.
- When used in conjunction with M-Pro7 Gun Cleaner, has unique conditioning technology that slows copper build up.

Applicable Uses

- Squad Designated Marksmen (M4/M16s).
- Sniper Systems (Sniper Accessory Kit).
- Light/Medium Machine Guns (M249, M240).
- Heavy Machine Guns (M2 .50 Cal).
- Weapons Cleaning Kits/Unit Arms Rooms.
