

# M-Pro 7

**OPTIMAL WEAPON PERFORMANCE. NO COMPROMISE.**

## M-Pro 7 Ultrasonic Cleaning Instructions

**M-Pro 7 Gun Cleaner** is a phenomenal ultrasonic cleaner and dissolves evenly in water. To remove heavy carbon fouling the formula can be diluted up to one part water: one part M-Pro 7 Gun Cleaner. For general cleaning and degreasing, dilute up to nine parts water: one part M-Pro 7 Gun Cleaner.

Adding water negates any corrosion protection, therefore, to displace the water, completely submerge weapon in M-Pro 7 Gun Oil (see instructions below).

**M-Pro 7 Gun Oil** is ready-to-use ultrasonic oil that quickly conditions, protects, lubricates and displaces all water from your firearm. In addition, the “thin coat” technology quickly drains from parts leaving a thin, but powerful film of protection.

### Cleaning Instructions:

1. Unload firearm before cleaning
2. Field strip firearm and remove stocks/grips
3. Rinse parts briefly in hot water
4. Place parts in a plastic tray and submerge in ultrasonic cleaner for 20 minutes
5. Remove barrels and run bore brush through
6. Return barrels to ultrasonic cleaner for 10 more minutes
7. Remove parts and rinse with clean hot tap water
8. If possible, blow dry parts with compressed air
9. Place parts in ultrasonic oil bath for 10 minutes
10. Remove all parts and allow oil to drain
11. Wipe all parts down and reassemble
12. Lightly oil bores, slide rails, etc.
