PRESS RELEASE

A three year search in the industry for a cleaner and protectant of our rifles has led to a partnership between Patriot Ordnance Factory (POF) and M-Pro7, a leading provider of military-grade weapons maintenance products.

POF has performed extensive testing with some of the top products in this market, as well as from other industries, and we are pleased to announce the use of M-Pro7's LPX Gun Oil as a factory pretreat and factory recommended all-purpose lubricant for your POF rifle.

Patriot Ordnance Factory rifle platforms offer versatility, quality and performance in many different climates and conditions. Because of that, and the need for a well-rounded cleaner, lubricant and protectant, we need a formula that will keep up to the constant punishment and abuse that our rifles are put through. M-Pro 7 LPX Gun Oil provides the highest possible protection against wear, humidity, and moisture and leaves a long-lasting film that repels dust/dirt and will not evaporate.

For more information on the M-Pro7 and its complete line of tactical-grade cleaning supplies, visit www.mpro7.com or call 1-800-937-4677.

M-Pro 7 Weapons Maintenance products were specially designed for military, law enforcement, and high-use weapons. M-Pro 7 technology reduces weapon maintenance time up to 80%. In line with the standards for safe technology established by Pantheon Enterprises, all M-Pro 7 products are odorless, non-toxic, non-hazardous, biodegradable, non-flammable, and environmentally friendly.
